

# High-Precision Plating for Ultra-Fine Components

Through our surface treatment technology and results, Create new values.

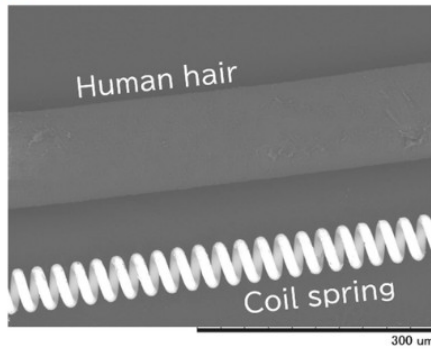

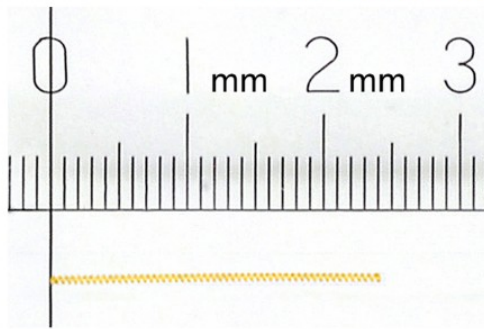

Striving to Be the World's No.1 in Micro Component Plating——

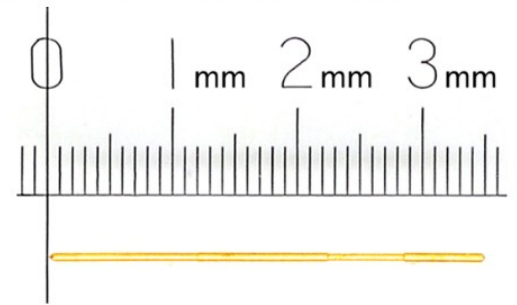

Micro-Precision Plating—ERG's Signature Strength.

We specialize in plating ultra-small parts with shapes too intricate to be seen with the naked eye, as well as micro components with complex geometries. When precision matters, trust ERG to deliver.

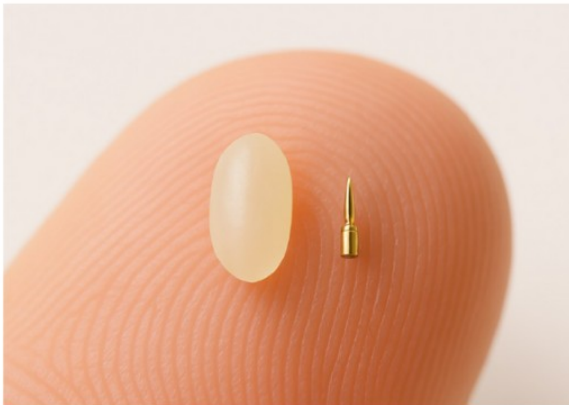

Ultra-fine spring with a wire diameter of 13 $\mu$ m and an outer diameter of 53 $\mu$ m

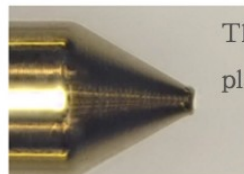

Nickel and gold plating applied to a component with an outer diameter of 70 micrometers

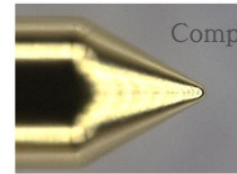

We are equipped to process micro components with diverse and complex geometries.

Functional plating can be applied without compromising the precision of delicate tip geometries.

Third-party plated components

Components plated by ERG

## Available Plating Types

We offer plating in Ni, Pd-Ni, Ag, Au, Au-Ni, and Rh.

Please feel free to contact us regarding other plating options as well.
